This email is to advise you that the U.S. Army Corps of Engineers, Pittsburgh District, has posted Solicitation W911WN27QA004, Borough of Millvale, Pennsylvania, Local protection Project (LPP) PL84-99 Rehabilitation, to SAM.gov, via the Procurement Integrated Enterprise Environment (PIEE) Solicitation Module, on 6 November 2026.

- The PIEE Solicitation Module Posting (to obtain the solicitation, specs, drawings, etc.) is:

https://piee.eb.mil/sol/xhtml/unauth/search/oppMgmtLink.xhtml?noticeId=W911WN27QA004&noticeType=SolicitationNotice

- The SAM Solicitation Posting (to view the solicitation details) is:

https://sam.gov/workspace/contract/opp/4de1cb6926904edd8a7588b8cf57ff1a/view

Quote due date, unless amended, is 11:00 AM ET, 8 December 2026.

The Millvale LPP was constructed by U.S. Army Corps of Engineers (USACE) in 1980 under the authority of Section 205 of the Flood Control Act of 1948 as amended. The project consists of about 6,200 feet of channel improvement including concrete gravity retaining walls, concrete wall supports, anchored concrete toe blocks, concrete cap walls, stone-filled gabion mattresses, flap gates, and access ramps. The LPP is an urban Flood Control Work (FCW), and it is not a multipurpose project.

Heavy rains from 1-12 April 2024 caused flooding which damaged the Project within Girty's Run, including bank erosion, shoaling, erosion of the improved channel, ruptured gabion baskets, washed-out concrete buttresses, and erosion of grouted riprap. Of particular concern are the washed-out buttresses which have migrated to the center of the improved channel, impeding streamflow. If the buttresses are not removed and stream bank improvements continue to deteriorate, there is a risk that debris will continue to accumulate and could ultimately damage the channel downstream of the impediment. To address these damages, Allegheny County requested rehabilitation assistance from USACE through the PL 84-99 program, which authorizes USACE to rehabilitate eligible Federal and non-Federal LPPs damaged or destroyed by floods. An agreement was signed on 6 August 2025 between the Borough of Millvale and USACE to complete the necessary repairs.

The project is located along Girty's Run and Boomer Run between Station 68+00 and Station 73+80, Millvale, Allegheny County, Pennsylvania.

The work is to be completed within 365 calendar days after written Notice to Proceed (NTP).

The North American Industrial Classification Code (NAICS) is 237990 – Other Heavy and Civil Engineering Construction. The Small Business Size Standard is $45,000,000.00. Any resultant award will be for one (1) Firm-Fixed-Price (FFP) Purchase Order.

If you have any questions or concerns, please do not hesitate to contact me.
