

Project Spectrum Webinar

June 11, 2026
11:00 a.m. – 12:30 p.m.

CMMC compliance is an achievable, mandatory requirement for Department of Defense (DoD) contractors. Because the CMMC program is now formally incorporated into the Code of Federal Regulations, baseline cybersecurity standards are required at all levels of the defense supply chain.

To help in your compliance efforts, DoD funded Project Spectrum offers free resources for businesses who need to comply with the controls outlined in the NIST 800-171 but lack the technical skills necessary. Join us at this free webinar where our speaker will discuss topics central to CMMC compliance with an emphasis on CMMC Level 1.

Topics

- *How can Project Spectrum help my business become compliant with CMMC?*
- *How do companies get started with Project Spectrum?*
- *What are the requirements placed upon applicants?*
