

Our government partner, the U.S. Army Engineer Research and Development Center (ERDC), is seeking innovative solutions for sensing and predicting operationally relevant variables that support U.S. Army planning and terrain operations in polar and subpolar environments. Up to \$4,000,000 may be available to make several awards.

Submission deadline: March 9, 2026, at 4:00 PM CT

View project details & submit: <https://www.erdowerx.org/advanced-polar-snow-and-terrain-sensing/>

We encourage you to explore this opportunity and submit a solution for consideration.
