

Our government partner, the U.S. Army Engineer Research and Development Center (ERDC), is seeking innovative solutions to advance large-scale additive manufacturing capabilities for expeditionary and contingency applications with Plasma Arc Additive Manufacturing (PAAM). Up to \$190,000 may be available to make several awards.

Based on your organization's capabilities, we thought this may be of interest to you or your network.

**Submission deadline:** March 27, 2026, at 4:00 PM CT

**View project details & submit:** <https://www.erdcerx.org/paam-for-large-scale-components/>

We encourage you to explore this opportunity and submit a solution for consideration.
