To submit your quote package, you must be registered in PIEE with the appropriate roles and must have an active SAM account.

Quotes are due by 12:00 PM ET, 23 November 2026.

Please reference SAM and PIEE for full scope but below is general information about this project:

The Canonsburg-Houston Local Protection Project (LPP) is an authorized federal flood damage reduction project spanning over 20,500 linear feet of channel improvements along Chartiers Creek. Originally constructed by USACE in two phases (Houston unit completed in 1970; Canonsburg unit completed in 1976), operation and maintenance responsibilities were subsequently transferred to Washington County.

Severe storm events resulted in substantial damage to the channel embankment along the right bank of Chartiers Creek, including displacement of stone protection and loss of

subgrade stabilization. This rehabilitation contract encompasses repair and re-armoring of the degraded channel reach to restore federal project integrity and design conveyance capacity.

The Anticipated Construction Cost is between is \$150,000.00 and \$300,000.00.

The contractor is responsible for all project submittals, including a Quality Control Plan, Accident Prevention Plan, and various shop drawings and product data for government approval.

Safety Compliance (EM 385-1-1): Offerors are advised that all work on this project must strictly comply with the latest edition of the U.S. Army Corps of Engineers (USACE) Safety and Health Requirements Manual (EM 385-1-1) (Link: https://www.publications.usace.army.mil/Portals/76/EM%20385-1-1%20_EFFECTIVE%2015March2024.pdf). Prior to commencing work, the contractor must submit and secure Government approval for a site-specific Accident Prevention Plan (APP) and comprehensive Activity Hazard Analyses (AHAs).

To enforce these standards, the contractor must employ a full-time, dedicated Level 1 Site Safety and Health Officer (SSHO) who must be present on-site at all times when work is in progress. The SSHO may also serve as the Quality Control System Manager (QCSM) but is strictly prohibited from serving as the project Superintendent. See *Personnel and Contractor Qualifications*.

Personnel and Contractor Qualifications: To ensure technical competency and safe execution of this project, the Government requires key personnel to meet strict experience thresholds. The contractor must assign a Project Superintendent with a minimum of five (5) years of construction experience, with at least five (5) of those years acting as a superintendent on earthwork and channel restoration projects similar in size and complexity. Additionally, the contractor must provide a Quality Control System Manager (QCSM) who has a minimum of five (5) years of construction experience on similar projects and holds a valid "Construction Quality Management for Contractors" (CQM-C) certification, as well as a dedicated Site Safety and Health Officer (SSHO).

For any question about this project, please utilize ProjNet. Reference Addendum to Section 00 21 00 – 01 for ProjNet information.

Please reference Section 00 21 00 – 04, Quote Package Submittal Instructions for the documents required to be submitted for your quote submission.

Please reference Section 00 21 13 – Instruction to Bidders for information on the basis of award and important notices about this project.

A Site Visit is not organized/planned, but all interested contractors are highly encouraged to visit the site on their own. Reference Section 00 22 00 – Supplementary Instructions for more information about the Site Visit.

Note: Payment Bonds and Performance Bonds are required for the awardee. These bonds are not required to be submitted as part of your quote submission. Bid Bonds/Guarantees are NOT required to be submitted as part of your quote submission.
