Program Performance and Student Outcomes Report

This handout provides an overview of key performance metrics for our program, including licensing examination pass rates, graduation rates, and post-graduation employment outcomes. We track these metrics continuously to maintain institutional standards, support programmatic evaluation, and fulfill regional and professional accreditation disclosure criteria.

Program Pass Rates

The table below reflects the performance metrics for program graduates sitting for their professional licensing examination. Data is aggregated for the entire program over the most recent three-year reporting cycle.

Year	Number of Students Taking the Exam	Pass Rate for 1st Time Test Takers
2025	10	50%
2024	18	27.78%
2023	4	75%

Note on Small Cohort Variations: Because our specialized program utilizes small, targeted student cohorts, minor changes in the absolute number of individual test-takers result in statistically significant shifts in annual percentage rates.

Graduate Completion & Attribution Rates

The data below outlines the institutional graduation and completion rates for our undergraduate pathways for the 2025 academic tracking cycle.

Program	Year	Number of Students	Rate
Associates (AS)	2025	13	46%
Bachelors (BS)	2025	28	50%

Post-graduate Employment & Advanced Education

This metric tracks the immediate professional transitions of our student cohorts following completion of their respective degree program tracks.

Reporting Year	Total Monitored Track Size	Employment Rate at Graduation	Advanced Education Enrollment
2025-2026 Academic Year	21	85.7%	9.5%

Date of Publication: Fall 2026
